

Building Calgary Trail North Construction Update

Edmonton

November 10, 2020 FILE: 20-2004-01a

CALGARY TRAIL NORTH INDUSTRIAL NEIGHBOURHOOD RENEWAL

The City of Edmonton has been doing road reconstruction in the Calgary Trail North Industrial Neighbourhood as part of the 2020 Neighbourhood Renewal Program.

Please note the following updates regarding the project:

- **Road work:** All concrete replacement and road paving has been completed as per schedule. Minor deficiency work will occur in the spring of 2021 as required in accordance with final project inspections.
- **Landscaping restoration:** Topsoil and most of the new sod has been placed throughout the project. Sod in some areas was not able to be placed due to the recent weather conditions and in accordance with the City of Edmonton construction specifications. Topsoiled areas will be reworked prior to placing sod in the spring of 2021.
- **New street lighting:** As part of the project and further improvements in the area, new street lighting will be installed in the spring of 2021 along 58 Avenue, 103-104 Street and 59 Avenue, 103a-104 Street.

Thank you for your understanding and patience as the City completes renewal work in your area. The City is working hard to deliver valuable infrastructure upgrades to support the city now and into the future.

Please retain this bulletin for your information.
